

Virtual Visitor

Challenge

The Coronavirus (COVID-19) is threatening to overwhelm our healthcare system. How do we keep family members in touch with their loved ones who may be in quarantine without visitors? How can we make sure patients are not left without family connection and support?

Solution

Tryten's Virtual Visitor for hospitals, temporary triage facilities, SNF's, and long-term care:

- Connects friends and family with their loved one over video.
- Rapidly connects over videos to remote experts & practitioners.
- Is easily pushed and positioned near the patient's bed.
- Has minimal footprint requiring less space.
- Easily cleaned.
- Brings the family members and friends to the bedside without exposure to infectious pathogens.
- Reduces the need for Personal Protective Equipment (PPE).

Benefits

Tryten's Virtual Visitor is a telehealth vehicle that:

- Helps family and friends stay safe and more readily available.
- Helps patient not feel as isolated and alone.
- Is easy to set up.
- Is cost-effective.
- Facilitates better patient care, at a cost-effective price point to deliver improved outcomes.
