

# Virtual Rounding

## Tablet Cart with Poly Sync 20

### Challenge

Health systems are introducing new workflows for vaccinations, testing, and treating patients with COVID-19 while continuing to provide care for their non-COVID patients. How do they manage possible surges, adapt their workflows, and make sure healthcare providers are protected from infection while leveraging their expertise?

### Solution

Tryten's Virtual Rounding Tablet Cart with Poly Sync 20 for hospitals, community care centres, temporary triage facilities, SNF's, and long-term care:

- Provides rapid **access to remote experts**.
- Is easily pushed and positioned for faster rounding.
- Has minimal footprint requiring less space.
- Will bring care where and when it is needed.
- Will assist in **workload balancing across practitioners** who are geographically distant and dispersed.
- **Minimizes the risk to the practitioner** and reduces the need for Personal Protective Equipment (PPE).
- **Poly Sync 20**
  - **Echo and noise reduction** provides clear patient/provider communication without interference from background noise
  - **Full duplex audio** for simultaneous natural conversations.

### Benefits

Tryten's Virtual Rounding Tablet Cart with Poly Sync 20 is a telehealth vehicle that helps:

- **Practitioners stay safe** and more readily available.
- Deliver virtual practitioner resource sharing that avoids wasted travel time and provides balanced workload.

- Facilitate better patient care, at a **cost-effective price point** to deliver improved outcomes.
- Overcome some of the challenges we will face with a rapid surge in patient care.
