

Virtual Rounding Assistant *with* Poly Studio P15

Challenge

Health systems, FQHC's, and SNF's are introducing new workflows for vaccinations, testing, and treating patients with COVID-19 while continuing to provide care for their non-COVID patients. How do they manage possible surges, adapt their workflows, and make sure healthcare providers are protected from infection while leveraging their expertise?

Solution

Tryten's Virtual Rounding Assistant with Poly Studio P15 for hospitals, community care centers, temporary triage facilities, SNF's, and long-term care:

- Supports applications like rounding, primary care, video remote interpreting, and behavioral health (MAT).
- Provides rapid **access to remote experts**.
- Is easily pushed and positioned for faster care delivery.
- Has minimal footprint requiring less space.
- Will bring care where and when it is needed.
- Will assist in **workload balancing across practitioners** who are geographically distant and dispersed.
- **Minimizes the risk to the practitioner** and reduces the need for Personal Protective Equipment (PPE).

Benefits

Tryten's Virtual Rounding Assistant with Poly Studio P15 is a telehealth vehicle that helps:

- **Practitioners stay safe** and more readily available.
- Deliver virtual practitioner resource sharing that avoids wasted travel time and provides balanced workload.
- Facilitate better patient care, at a **cost-effective price point** to deliver improved outcomes.
- Overcome some of the challenges we will face with a rapid surge in patient care.

- **Poly Studio P15 supports:**
 - Multiple video platforms.
 - **'Room on Wheels'** to assist in Rounding, ICU observation, e-Sitting, VRI and other virtual use cases.
 - Rich clear audio, NoiseBlockAI to keep out distracting sounds.
