

Virtual Rounding

Tablet Cart with Poly Sync 20

Challenge

Health systems are introducing new workflows for vaccinations, testing, and treating patients with COVID-19 while continuing to provide care for their non-COVID patients. How do they manage possible surges, adapt their workflows, and make sure healthcare providers are protected from infection while leveraging their expertise?

Solution

Tryten's Virtual Rounding Tablet Cart with Poly Sync 20 for hospitals, community care centres, temporary triage facilities, SNF's, and long-term care:

- Provides rapid **access to remote experts**.
- Is easily pushed and positioned for faster rounding.
- Has minimal footprint requiring less space.
- Will bring care where and when it is needed.
- Will assist in **workload balancing across practitioners** who are geographically distant and dispersed.
- **Minimizes the risk to the practitioner** and reduces the need for Personal Protective Equipment (PPE).
- **Poly Sync 20**
 - **Echo and noise reduction** provides clear patient/provider communication without interference from background noise
 - **Full duplex audio** for simultaneous natural conversations.

Benefits

Tryten's Virtual Rounding Tablet Cart with Poly Sync 20 is a telehealth vehicle that helps:

- **Practitioners stay safe** and more readily available.
- Deliver virtual practitioner resource sharing that avoids wasted travel time and provides balanced workload.

- Facilitate better patient care, at a **cost-effective price point** to deliver improved outcomes.
- Overcome some of the challenges we will face with a rapid surge in patient care.
